

Source lanyards made from eco-friendly PLA

And reduce the environmental impact of your business

Promotional lanyards made completely from PLA

Oeko-Tex Standard 100-approved lanyards

Tap into the worldwide trend towards products with minimal environmental impact. Our lanyards are free from harmful substances, and come with Oeko-Tex Standard 100 approvals. They're also produced entirely from PLA, a material derived from easily renewable corn. The complexities of the PLA dyeing process turn many manufacturers away from this eco-friendly material. We've gone the other direction. Through R&D investments, we have come up with 14 different lanyard colors for you to choose from.

Cleaner production than competing makers'

Our commitment to environmental preservation doesn't stop with material choice. We're also one of the few makers to have their own industrial wastewater treatment plant. This helps us keep our wastewater clean, by filtering out any harmful chemicals that result from production.

Dyes sourced from Germany's DyStar

Due to the complexity of dyeing PLA materials, we employ only dyes of the finest quality from Germany's DyStar. And since we're one of the few suppliers to have access to an electroplating license, we're able to produce badges, emblems, promotional pins and other lead-free metal products. Our team is ready to take your orders. Contact us now.

Lanyards, customizable to match your company name or event
